SIEMENS FANUC

Expertise in machine retrofitting and industrial automation

Customized design, improvement and development of your high-precision machining systems

PRACARTIS Swiss specializes in the design, construction and modernization of special machines, particularly grinding and superfinishing machines.

Also recognized for its expertise in the integration of automation solutions on machine tools and special machines, PRACARTIS Swiss can help you with

turnkey projects. From design to training, including maintenance and troubleshooting on test benches or on-site.

As a partner, we offer our customers flexible, responsive and customized support. Our team works day in, day out to pass on its know-how for a long-lasting, efficient relationship.

PRACARTIS Swiss is the Swiss subsidiary of the PRACARTIS Group : nearly 160 technicians, engineers and administrative staff are mobilized on a daily basis to support you and develop precision machining solutions tailored to your needs.
